## Pirate Cannon

Cannon base constructed with 2' pink foam and 2x4s, painted with base coat and wood grain tool

Cannon constructed using 2 different diameter cardboard pipes and pink foam..  
airzooka in the end to supply us with smoke rings

**Check out the smoke rings this baby makes**

**A fogger is set under the cannon in a plastic storage bin painted black to blend in with the base. The fog is piped into the cannon from underneath. A small strobe was placed inside the cannon facing out hooked up to a mic and color organ, so every time you fire off the cannon the strobe lights up**
