MAKING EYES MOVE

On the left are two of the roll-on bottles tops cut from the bottle.

Here is a close up of a roll on ball drilled out with a piece of wire thru the center. I also wrapped wire around the rim and hot glued it in place.

This was how I connected two eye together.

Here's two pictures just showing the eye movement connected. I was going to hot glue a pair of eyes on to the wire with the hot glue on the tips. There's better pictures below.

I laid the eyes in place and on the here I'm holding the eye so you can see how it was to be mounted on the movement.
