Glen's Tombstones

Not the best picture, but you get the drift. We used:

Pink Insulation Styrofoam

Compressed cardboard

Liquid Nails or 3M Spray glue

X-acto knife

Paint Gray - Black - (Fluorescent Paint Green - Yellow - Orange)

Glue the compressed cardboard to the back of the Pink insulating Styrofoam.

Draw a tombstone shape on the Styrofoam

Cut it out

We used the computer to print out epitaphs. Then we taped them on the Styrofoam and used an X-acto knife to trace (cut) the letters out.

Omarshantedtrail.com

Now we primed them light gray. Then use a darker gray and black to resemble stone.

Use the fluorescent colors to paint the epithets

Halloween night we put a 42" dual blacklight in front which make the epithets glow. They look great.
