Stair Ghost

The Stair Ghost was an indoor full sized peppers ghost effect. Caught many a party guest off guard with this one!

Obtained from
Omarshauntedtrail.com

The **Upstairs Ghost** effect was created using a door sized piece of plexi glass at the top of the stairs.

We blocked off the stairs to keep people at a distance. The ghost prop was placed to the right of the stairs in a small space surrounded in black plastic.

A blacklight lit the scene and a small fan kept the figure moving. The room behind the plexi glass was lit with a noise activated lightning effect attached to a lamp.
