## Bubbles and a Strobelight

---

# Excellent Bubble-Strobe Light Combination

for maximum effect and minimum work

In the above photo, a commercial DJ bubble machine is spitting out a huge number of bubbles and they appear to dance around the air, because they are illuminated by a strobe light. Check out the movie below. The bubble machine will cost you \$90-100, but is useful for many Halloweens to come and other festive occasions. To run the bubble machine, a 1 gallon bottle of bubble solution at ToysRUs is \$3 and will get you through the night. The strobe can be found for \$20-30 and this takes minutes to set up. The return on this combination is fantastic. Kids of all ages love bubbles and the strobe adds a wonderful effect. Some kids forgot about the candy.

**Bubble Machine: American DJ BU-200 or MBT BBL-1**
