Tombstone Leaper

I like props that are pneumatic and just plain scare people. This is my first attempt at a leaper.

I'm covering the "body" with expanding foam...this stuff is messy...gloves are mandatory.

Using the foam to make the guts turned out great!!! They are so real looking it's spooky. I made a wire frame and covered this with tape first then came a coating of expanding foam. With a little sanding and painting this leaper is really creepy looking.
