Skull Fountain III

Our take on the ever-popular Skull Blood Fountain.

A cheap... thing... from Wal-Mart. I think it's supposed to be a planter but it was only \$10.

Four foam filled skulls, \$5 each again at Wal-Mart.

A pond pump scavenged. FREEBIE!

We attempted to have just a short length of tube from the pump but it was too much water pressure.

We had to put the long length back on to slow the water a bit to try to keep some of it in the bowl.

Total price: \$30
