Pillars for the Fence Gates

Materials List

Our materials list was taken from the notes on "Raven Manor" so if you need more pictures or instructions that is the place to find them.

Sheets of Plywood

2x2's

This is Jerry, he is the builder of all the halloween projects and we do say he does a wonderful job!

Here is the work area where we build most of our projects.

Obtained from
Omarshauntedtrail.com

Here are some photos of the frame work.

Here you can get an idea of how tall the pillars are and on this photo the tops are not attached yet.

Today (9/29/07) the framework got started for the corner pillars that will be connecting the fence post sections. This year we only have time to build 2 but we'll start working on these and the goal is to have a few more as the cemetery fence expands(2008) for other things it will house!

Arch for the Cemetery Name

I looked at a few ways to make this arch for our cemetery & tried to read what people had to do so I guess we decided we are doing ours with wood instead of PVC pipe.

I picked up the wooden letters at a Walmart that was selling out for them so they were only \$1.50 ea. problem was I was short a "D" & a "C". SO I bought a "O" that we could cut and we have to find or make a "D"
