Build your own Grave Stones

Halloween Yard Haunt Prop Building

Bill of Materials

- (1) 4' x 8' sheet of 2" thick insulation foam board. Either blue or pink stuff works great!
- (2) Some 8"x11" paper
- (3) Gallon or a quart of Gray paint
- (4) Sand.

Tools:

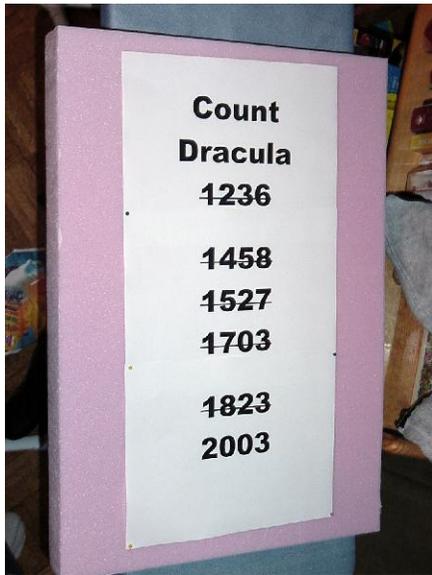

- (1) Dremmel
- (2) Straight edge
- (3) Tape measure
- (4) Exacto Knife
- (5) Paint brush

Instructions:

Cut out a nice slab of the insulation board. I made mine about 2' x 1.5'

Either draw an epitaph on a piece of 8"x11" paper or print out an epitaph. Pin it to the board.

Next, take an Exacto Knife and trace around the edges of the lettering. It is very important to score the insulation.

Next, Use a Dremmel to remove the material from the lettering.

Just a different shot. Here you can see we glued another piece to the top and the bottom

Next, take the board, and cover it with Gray Paint as thick as you can. While the paint is still fresh, cover it with sand.

Let it dry and the end result looks like stone.

Here are a couple samples:
