Directions for printing and wearing your “FleshFace” mask.

DISCLAIMER: This mask is for novelty purposes only. Print it out and wear it at your own risk. HauntedHotSauce, Inc. will not be responsible for damage to your face or your printer as a result of your decision to follow the directions below.

- Get an old paper grocery bag or similar craft paper and cut it to 8 1/2” x 11”.
- Smooth out the paper and insert it into your printer.
- Print mask (page 2) onto the paper. (Don’t print this page...too much black.)
- Cut out mask around the dark outside line.
- Cut out eye holes and mouth hole.
- Wad mask up into a ball and then smooth out for maximum “wrinkled flesh” effect.
- Roll duct tape or use double sided tape and place tape pieces onto the back of the mask. We recommend that you use one piece over each eyebrow, one piece on each cheek, one piece on the chin and one piece on the bridge of the nose.
- Run amok and enjoy scaring people with your FREE “FleshFace” mask!
