Growing Ghost

This effect can be made with a few pieces of 1" PVC pipe, a pair of old gloves, a Styrofoam wig stand, a spooky mask, and a large piece of opaque material sew into a hooded gown. Just lay flat on ground or hide behind house or bushes, then at the right time arise lifting your frame upward. You may need to cut a small flap to see through if you plan to walk around. You can also insert one piece of PVC into another with a fitting to extend.
