Commercial LED Creature Eyes

There seems to be a lot of excitement of the various Halloween e-mail lists concerning LED eyes for creatures. I'm a little ambivalent about this, because with LED eyes it is easy to do *something*, but hard to do *something good*.

This page lists commercial LED creature eyes. We also have some help in the event that you want to make your own simple LED eyes.

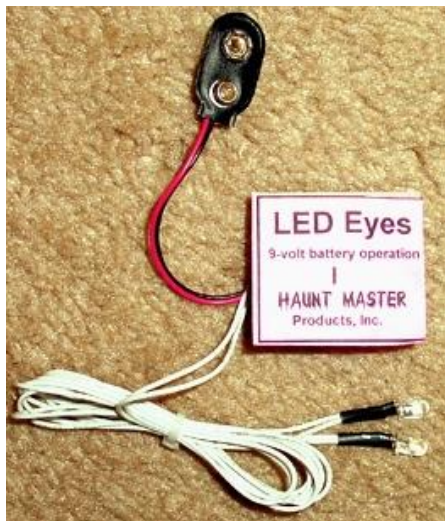

Haunt Master Products

To the best of my knowledge, Haunt Master Products was the first company to offer LED eyes.

- [Haunt Master Products](#) LED Eyes

Haunt Master Products	#???	LED Eyes	\$10-\$12, depending on color [7/2004]
---------------------------------------	------	----------	--

The circuit provides two LED eyes that brighten and dim automatically.

They offer red, blue, white, green, orange, yellow, and UV.

LED Eyes come in three cycles: I = Slow, a seven second cycle ; II = Medium, a five second cycle; III = Fast, a three second cycle. The dimming and brightening phases are identical in all three but the time of maximum brightness is changed to vary the total cycle time

Runs on a 9V battery. Average life for a heavy duty battery is about 48 continuous hours.

- [Haunt Master Products](#) Multi-Color LED Eyes
-

Haunt Master Products	#???	Multi-Color LED Eyes	\$15 [7/2004]
---------------------------------------	------	----------------------	---------------

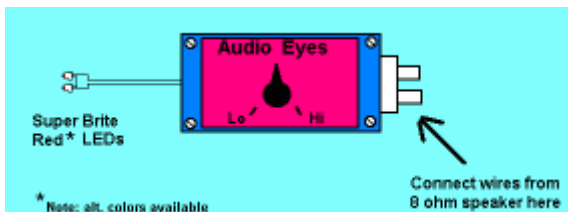

The circuit provides two LED eyes that change color automatically.

LEDs will glow red, then green, then blue and back to red, etc. in a continuously changing pattern of color.

Runs on a 9V battery. Average life for a heavy duty battery is about 48 continuous hours.

- [Haunt Master Products](#) Audio Eyes

Haunt Master Products	#???	Audio Eyes	\$16-\$18, depending on color [7/2004]
---------------------------------------	------	------------	--

This is a pair of super brite LEDs, that fluctuate with any sound source.

They offer red, blue, white, green, orange, yellow, and UV.

Runs on a 9V battery. Average life for a heavy duty battery is about 48 continuous hours.

[Haunt Master Products](#) Strobing LED Eyes

Haunt Master Products	#???	Strobing LED Eyes	\$12-\$14, depending on color [7/2004]
---------------------------------------	------	-------------------	--

The circuit provides two LED eyes.

Strobing LED Eyes flash rapidly as they also exhibit a theater dim and brighten effect.

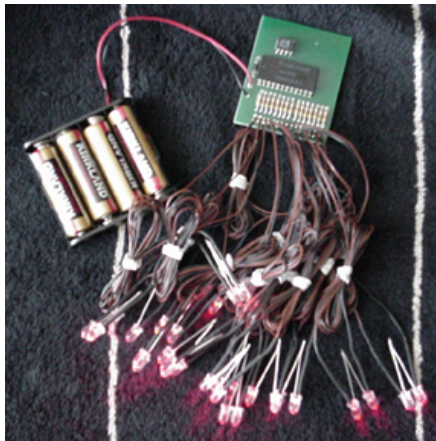

They offer red, blue, white, green, orange, yellow, and UV.

Runs on a 9V battery. Average life for a heavy duty battery is about 48 continuous hours.

Cowlacious Designs

- [Cowlacious Designs](#) Cave Eyes

Cowlacious Designs	#???	Cave Eyes	Assembled - \$35 [9/2003]
------------------------------------	------	-----------	---------------------------

The circuit controls 15 pairs of L.E.D.s that look like beady little rodent eyes. All the eyes are normally on, with one pair at a time blinking off in semi-random fashion, as if the animal had to close its eyes briefly.

Runs off of 4 AA batteries.

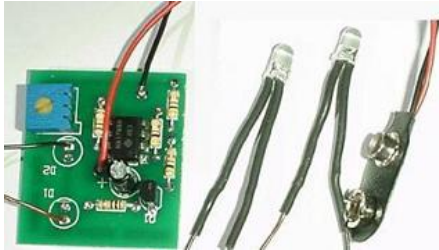

Various LED options are available.

The pairs of eyes are on 4' wires so that they can be placed around the cave, bushes, etc.

- Kit with all the parts, chips, circuit board, and 40' of wire - \$20.00.

[Cowlacious Designs](#) Fading Eyes

Cowlacious Designs	#???	Fading Eyes	Kit with all the parts \$7; Assembled unit - \$10 for Red or Yellow; \$15 for Blue, Orange, Green, UV (Black light), or Purple. [9/2003]
------------------------------------	------	-------------	--

The circuit provides two LED eyes that can be adjusted between a slow fade-in/fade-out to quick pulses. The speed is changed by adjusting a variable resistor with a small screw driver.

Runs off 9v battery.

Various LED options are available.

- LED's are attached to the circuit board with 24" of wire.
- Kit with all the parts \$7 (Batteries Not Included)

Terror By Design

- [Terror By Design](#) EyeFX

Terror By Design	EyeFX	Eye Effects	\$16.95-\$19.95, depending on color [3/2004]
----------------------------------	-------	-------------	--

The circuit provides two LED eyes that can be set for various effects.

They offer red, green, and blue.

The module can be set for one of five different effects.

[Terror By Design](#) EyeFX-CC

Terror By Design	EyeFX-CC	Color Changing Eye Effects	\$16.95 [8/2004]
----------------------------------	----------	----------------------------	------------------

The circuit provides two LED eyes that automatically change color.

The unit is easily configured for one of five different effects: 1-Slow Blending Color Change-Colors blend from Red to Orange to Green and back again. 2-Fast Blending Color Change-As above but faster.

3-Quick Strobe Change-Red/Green Strobing changing in speed and blending to Orange then slowing to the Red/Green strobe. 4-Fading Strobe-Increasing green intensity, strobing Red then fading Green. 5-Orange Pulse-A quick hypnotizing, orange strobe.

The module can be set for one of five different effects.

Runs for 24-28 hours using a 9 volt battery or many days with optional 4 AA battery holder.

Halloween Lights

- <http://mywebpages.comcast.net/pmailley>

LED Prop Eyes

http://mywebpages.comcast.net/pmailley	#???	LED Prop Eyes	\$5 [8/2004]
---	------	---------------	--------------

- The circuit provides two LED eyes that are on all the time.
- They offer white, blue, purple, red, green, and yellow.
- Powered by a 9V battery.

Ghost Ride Productions

- [Ghost Ride Productions](#) - GLOWING STROBE EYES

Ghost Ride Productions	#GSE-X	GLOWING STROBE EYES	\$20 [4/2005]
--	--------	---------------------	---------------

- 24mm plastic eyes are adjustable from slow fade to rapid flash.
- They offer blue, red, and green.
- Powered by a 9V battery.
