Sparks Anyone

In this scare a heavy metal screen mesh is nailed to the indoor frame over a window. Connect a ground cable between the ground terminal of a charged car battery and the screen. Attach a second cable to the positive terminal of the car battery and the other end of the cable is connected to a metal rod or clamp. Jumper cables can also be used.

A costumed character hides behind the old drapes of the window either dressed in all black, or as a rotting corpse. When a patron passes by the window the character scrapes the rod or jumper cable clamp across the screen sending out a surprise shower of sparks from the screen.

Use the loud sound effect of a boom to add to the scare. User wears heavy rubber gloves.
