

## DEAD MEN AT WORK

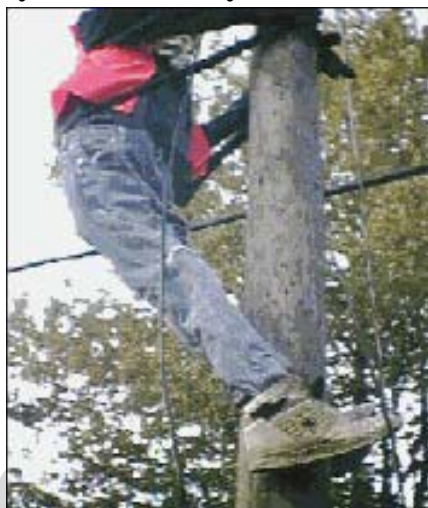

<http://www.ironman.ourfamily.com/page15.html>

Our newest project was inspired by a three hour delay on the highway. I am sure many can relate. We have recreated the scene in our side yard by the road.

Our crew is made of chicken wire formed to fill clothing. It was a blast to make, very easy stuff here. They took one night to make and one evening to install.

Obviously you should use **EXTREME** caution when working near electrical wires. Check with your power company to make sure you are safe.

I found a roll of brilliant orange material at Wal-Mart for \$1.00 a yard. Having no clue how I would use it, it got stuck in the Halloween pile and we waited. Things always come up. Just another reason why you should NEVER pass up a bargain.
