Skull in Spiderweb

For my "infestation" theme, I added a couple of hanging skulls to my scene with the cocoon victim. Click on the titles to see a full description of each step.

Step 1: Get a Cheap Skull

These are simply plastic, hollow skulls.

Step 2: Cover it With Cotton

I took some cotton (you could use stretched cotton balls or decoration spiderwebs) and applied it to the skull with latex paint.

Step 3: Paint and Hang in Web

I experimented and added a bit of liquid latex to give it that yellowed skin look, but you really don't need it. Finally, I wrapped my skulls in webbing and hung them from the ceiling.
