Planet Evil

Spider Victim

This prop is one of my favorite props. It was very easy to make too.

Materials;
-cheap 5 dollar skeleton (available at ant Halloween store around Halloween)
-old clothes
-plastic wrap
-cheap spider webs

1. Assemble the skeleton.
2. Dress the skeleton.
3. Wrap the skeleton in the plastic wrap.
4. Spread the cobwebs around the skeleton and you have a web victim.

Here is an idea for what you could use this for. Build a giant spider and web. Tie a rope around the legs of the web victim and hang it upside down in the giant web. And there you have it, a great looking prop.

This picture is kind of hard to see, just look closer. This one we didn't put clothes on but added paint on the eyes.
