

THEHORRORDOME.COM PROP DIRECTIONS PAGE

<http://thehorrordome.com/HDPROPS/ArmyofDarkness.htm>

Now this is a lawn decoration. Add a fogger some lighting and you have instant Horror!

## MATERIAL'S NEEDED -

1 - Dimensional Laboratory Skeleton's

1 - Glue Gun

1 - 5' or 6' wooden stick

1 - Plastic Sword or Shield ( or both )

Optional L.E.D. for the eyes connected to a 9 volt battery

STEP 1 - Get yourself a few of the Dimensional Laboratory Skeleton's we have in our Bodies Shop.

STEP 2 - Use your glue gun to glue the joints together, you will have to hold the joints in position until the glue cools down. Patience is the key here, the longer you wait for the glue to cool the less problems you will have.

STEP 3 - Glue a sword or shield or both on the hands of your skeleton. You can even get some burlap and make capes.

STEP 4 - Glue a stick ( like a broom handle ) on the back of your skeleton so you can stick him in the ground. Make sure the stick extends about a foot lower then the feet of the skeleton so you can stick him in the ground.

STEP 5 - Connect the L.E.D.'s to the eyes by drilling a hole in each eye and running the wires that connects to the L.E.D.'s out the back of the skull. Then run the two wires from each L.E.D.'s to the 9 Volt Battery. Make sure the L.E.D.'s are at least 3 volts each, otherwise they will burn out.( this step is optional )

THAT'S IT ANOTHER HORROR DOME PROP MADE EASY.
