CreepersCreek's Card Holder

Thank you to CreepersCreek who provided me with images and steps to make a witch finger card holder.

Step 2: Cut a Slit Behind the Nail

With a sharp hobby knife, make a small slit behind the nail of the finger approximately 1/8 inch deep (in the picture, CC is squeezing the sides to emphasize the cut).

Step 3: Stuff Finger with Paper

Stuff the pointed end of the newspaper wad into the finger. Stick the newspaper-ball end of the finger into the pot. You could also use plasticine if you have some on hand.

Step 4: Add Moss and Card

Stuff black Spanish moss around the finger to hide the newspaper. While squeezing the the finger slightly (as shown in the previous picture), slide the card into the slit.
